1958 Soybean BLUE BOOK

THE BIG 3

engineered for high capacity and top notch cleaning

1000 bu. of wheat and soybeans 600 bu. of rice per hr. Built in steel or wood construction

THE SUPER 2248-D TWINFLOW

Built in steel and wood construction 3000 bu. of wheat and soybeans

2500 bu. of corn

2000 bu. of corn

1800 bu. of rice per hr.

THE QUA 6000 Built is

THE SUPER 4488-D\$

6000 bu. per hr. Built in steel construction only

These are three of over sixty models to do your screen and air cleaning job best. The Clipper line includes precision seed cleaners, a complete line of bucket elevators, cob breakers, polishers, dust collectors, vibrating pits and conveyors, debearders, huller-scarifiers, etc.

RANDOLPH GRAIN DRIERS-300 to 2500 bu. per hr. capacities.

Missouri-O. H. Acom, Wardell.

Ohio—David G. Wing, Mechanicsburg; John Sawyer, London.

Ontario, Canada-A. E. Jolley, Chatham.

ACTIVITIES

The American Soybean Association is the non-profit organization devoted to the interests of soybean growers and handlers of the nation. Organizational affairs are directed by a board of directors consisting of 15 members chosen by vote from the states where production is heaviest. Board membership is limited to actual producers of soybeans.

Objectives of the American Soybean Association include the bringing together of all persons interested in the production, distribution and utilization of soybeans; the collection and dissemination of the best available information relating to both the practical and scientific phases of the problems of increased yields coupled with lessened costs; the safe-guarding of production against diseases and insect pests; the promotion of the development of new varieties; the encouragement of the interest of federal and state governments and experiment stations; and the rendering of all possible services to the industry.

FIGHTS YOUR LEGISLATIVE BATTLES. The American Soybean Association promotes new markets and encourages the expansion of present markets for soybeans and soybean products, counsels with governmental agencies on programs affecting the soybean crop, represents and protects the interests of soybean growers and legislative matters and sponsors and encourages legislation and appropriations for research work on varieties, diseases, pests, new uses, and on

factors limiting or affecting usage of soybean products. Association officers spend large amounts of time representing the interests of soybean growers in Washington and in the state capitals on legislative matters.

PROMOTES MARKETS for soybeans and soybean products in the United States and in foreign countries. Constant contacts with export buyers and users serve to encourage and export export markets for soybeans, soybean oil meal, soybean oil, lecithin and other products. Encouragement and promotion of markets for soybeans and soybean products in industry, human food and in livestock feeding operations are a major project of the Association.

In 1956 the American Soybean Association signed an agreement with the Foreign Agricultural Service of the U. S. Department of Agriculture for a soybean market development project in Japan to be financed by P. L. 480 funds and funds contributed by the soybean industry. The Japanese-American Soybean Institute in Tokyo is the operating agency for this project.

HOLDS ANNUAL CONVENTIONS with the nation's outstanding soybean authorities as speakers. Its resolutions adopted there serve as guides for the Association during the year.

ENCOURAGES YIELD CONTESTS through which comparisons of growing practices and varieties between counties and states become possible.

ANSWERS YOUR QUESTIONS. The executive office of the American Soybean Association at Hudson, lowa, serves as a clearing house of information for the industry, answering many thousands of questions that come by postcard, letter and telephone each year.

PUBLICATIONS

The Soybean Digest is the only magazine in America devoted to soybeans. Published monthly by the Association it goes to all members of the American Soybean Association. The Soybean Blue Book is the annual directory of the industry. Late News, Association newsletter carrying the latest crop and market information, is mailed first class to subscribers 32 times yearly.

MEMBERSHIP

Active Membership in the American Soybean Association is open to individuals on payment of annual dues of \$5 and includes subscription to the Soybean Digest.

Associate Membership is open to business organizations, corporations, partnerships and other agencies interested in the welfare of the soybean industry at a cost of \$10 per year, including one subscription to the Soybean Digest.

NOW measure oil content of soybeans IN 10 MINUTES

YOU CAN PROFIT 3 WAYS WITH THE SEEDBURO STEINLITE
OIL TESTER MODEL 300-LOS

- Accurate measurement helps you select beans with high oil content.
- Fast measurement lets you quickly segregate beans of similar oil content for processing.
- Measurement of Meal—gives you an easy, accurate check on the efficiency of your expellers.

The Seedburo Steinlite Oil Tester gives you oil content within .5 of 1% of the official Soxhlet extraction method. Simple to operate by following illustrated instructions. No previous experience necessary. Designed for the rapid measurement of oil content of soybeans, flax, peanuts, cottonseed, expeller meal, and other oil bearing products.

NEW — SEEDBURO STEINLITE 500-RC MOISTURE TESTER FOR WHOLE GRAINS

Please write for information and prices on the above Seedburo Steinlite Testers.

Here are a few of the advantages offered in the REVOLUTIONARY NEW MODEL 500-RC:

- 250 Gram Sample—double the size of the ordinary sample. Far greater accuracy more representative of entire load.
- Meter registers automatically no chance of errors.
- Completely new, improved circuit and test cell.

By following easy instructions an operator can make accurate tests in 60 seconds. Preserves samples for re-checking — if necessary — or samples can be returned to stock.

DO YOU HAVE A SEEDBURO CATALOG?

If not, send for your free copy today. You will find it a dependable "one stop" source for testing, grading, and handling equipment and supplies.

Chairman of the Board-M. D. McVay.

Vice Chairman of the Board—Glenn Pogeler.

Regular membership in the National Soybean Processors Association is limited to individuals, firms or corporations regularly engaged in the actual processing of soybeans. The Association now has 65 members who regularly process more than 85% of the soybeans crushed in the United States.

Recently the constitution of the Association was altered to provide for associate memberships. Firms which are consumers of soybean oil and/or soybean oil meal now are eligible for associate membership. A number of refiners and mixed feed manufacturers are now associate members of the Association.

The Association policy is determined by its board of directors who represent all sections of the processing areas and all types of processing units. The 11 committees of the Association carry on the general activities of the group.

Through this organization, equitable trading rules have been developed which have admirably and fairly served the buyers and sellers of soybean products during the years in which the soybean industry has made such remarkable growth.

The intense research activity fostered by the Association and its members has played an

important part in placing the industry on the high plane which it enjoys today. The promotional efforts of the Association and its members have established a place for soybean products in highly competitive fields. Through this research and promotional activity the products of soybeans have become standard essentials in our food, feed and industrial markets.

In March 1948 the Association launched a national soybean crop improvement program with J. W. Calland of Decatur, Ind., as director.

Since the inauguration of the program, some 300,000 copies of the booklet, Soybean Farming, have been distributed. The publication is now in its third edition. A publication, Soybean News, issued four times a year, is being sent to a mailing list of over 21,000. A recent activity has been the production of a sound color 16-mm movie entitled, Soybeans—the Feature Story. This film runs 27 minutes. It is available from the American Soybean Association, Hudson, lowe, the university film libraries in the principal soybean producing states and from the Modern Talking Picture Service, Inc., 142 E. Ontario St., Chicago 11, Ill. Soybeans—the Feature Story is now being produced in black and white for use on television stations and has been viewed by more than 12 million people. Prints for TV showings are available from Modern Talking Picture Service, TV division, 219 E. 44th St., New York 17, N. Y.

Working with the Crop Improvement Council is an advisory board made up of agronomists from 18 of the principal soybean states and two members of the U. S. Regional Soybean Laboratory. This board works closely with the Council in all matters of soybean production research, variety improvement and better cultural practices.

SOYA FOOD RESEARCH COUNCIL

Organized 1936.

Address—1026 17th St., N. W., Washington 6, D. C.

Chairman-W. R. Eichenberger.

Vice Chairman-J. J. Sellner.

Treasurer-H. A. Olendorf.

Secretary-Douglas Dies.

General Counsel-John D. Conner.

Representing American Soybean Association— Geo. M. Strayer.

This Council, which represents the interests of both the manufacturers of soy food products and the growers of soybeans, is primarily interested in scientific research, new product studies, refinement of methods, and developments of new markets.

During the war and postwar periods, this group was the channel through which the industry assisted the government in bringing about public consciousness of the high food value and comparative low cost of say protein products. With helpful advice from government technologists, standards were adopted.

At government request substantial increases

were made in the industry's productive capacity.

In recent years there has been large usage of soy flour products in various parts of the world. American usage has increased. There has been a growing realization, both in public and in government, that edible soy protein is the key to providing low-cost protein to millions whose diets are dangerously low in proteins.

In the past few years various types of scientific research on soy flour have been or are being carried on in the following institutions: University of Illinois, Purdue University, University of Minnesota, Kansas State College, Pittsburgh University, Midwest Laboratories, U. S. Regional Laboratories, and elsewhere.

This work is far more than matched by the studies conducted in the large laboratories of private companies.

Today soy flour is used in many food articles including:

Bakery products, breakfast foods, candies, chocolate, diabetic foods, health drinks, ice cream cones, ice cream powder, infant foods, macaroni and spaghetti products, meat products, prepared mixes and pet foods.

SOYBEAN COUNCIL OF AMERICA, INC.

Organized and incorporated 1956, Address—Hudson, Iowa.

OFFICERS

President—Howard L. Roach, Plainfield, Iowa. Vice President—David G. Wing, Mechanicsburg, Ohio.

Secretary—R. G. Houghtlin, Chicago, III.

Treasurer—Albert Dimond, Lovington, III.

Frecutive Director—Geo. M. Strange Hude

Executive Director—Geo. M. Strayer, Hudson, Iowa.

DIRECTORS

D. O. Andreas, Honeymead Products Co., Mankato, Minn.

S. E. Cramer, Swift & Co. Oil Mill, 4115 Packers Ave., Chicago, III.

W. E. Huge, Central Soya Co., Inc., 300 Fort Wayne Bank Bldg., Fort Wayne, Ind.

Dwight Dannen, Dannen Grain & Milling Co., St. Joseph, Mo.

R. G. Houghtlin, National Soybean Processors Assn., 3818 Board of Trade Bldg., Chicago 4, III. Ralph Golseth, Lauhoff Grain Co., Danville, III. Richard Westley, Glidden Co., 1825 N. Laramie Ave., Chicago, III.

M. D. McVay, Cargill, Inc., 200 Grain Exchange, Minneapolis 15, Minn.

Donald B. Walker, Ralston Purina Co., 835 S. 8th St., St. Louis, Mo.

Jake Hartz, Jr., Jacob Hartz Seed Co., Inc., Box 109, Stuttgart, Ark.

Chester B. Biddle, Biddle Farms, Remington, Ind.

John W. Evans, Easthome Farm, Montevideo, Minn.

David G. Wing, Mechanicsburg, Ohio.

Howard L. Roach, Roach Farms, Inc., Plainfield, Iowa.

Albert Dimond, Rt. 1, Lovington, III.

John Sawyer, Orleton Farms, Rt. 3, London, Ohio.

Geo. M. Strayer, Hudson, Iowa. C. G. Simcox, Assumption, III.

COMMITTEES

Executive committee—S. E. Cramer, Swift & Co., Chicago; Ralph Golseth, Lauhoff Soya Co., Danville, III.; Albert Dimond, Lovington, III.; David G. Wing, Mechanicsburg, Ohio; Richard Westley, Glidden Co., Chicago; Howard L. Roach, Plainfield, Iowa.

Policy committee—John Sawyer, London, Ohio; Dwayne Andreas, Honeymead Products Co., Mankato, Minn.; Scott E. Cramer, Swift & Co., Chicago; Wing; Eugene Rhodes, A. E. Staley Manufacturing Co., Decatur, III.; Jacob Hartz, Jr., Jacob Hartz Seed Co., Stuttgart, Ark.

Research committee-Chester B. Biddle, Rem-

ington, Ind.; Westley; John W. Evans, Montevideo, Minn.; Sewall Andrews, General Mills, Inc., Minneapolis.

Finance committee—Hartz; William Huge, Central Soya Co., Fort Wayne, Ind.; Donald Walker, Ralston Purina Co., St. Louis; M. D. McVay, Cargill, Inc., Minneapolis; Strayer; Dimond; Glenn Pogeler, North Iowa Cooperative Processing Association, Mason City, Iowa; Biddle.

Trade development committee—Andreas; Huge; Wing; Ersel Walley, Walley Agricultural Service, Fort Wayne, Ind.; A. C. Hoehne, Archer-Daniels-Midland Co., Minneapolis; Strayer.

Public relations committee—Dwight L. Dannen, Dannen Mills, St. Joseph, Mo.; Cramer; Dimond; Sawyer.

Education committee—Golseth; C. G. Simcox, Assumption, III.; Coleman Crews, Keiser, Ark.; Westley.

Merchandising committee—R. G. Houghtlin, National Soybean Processors Association, Chicago; Crews; R. B. Jude, Spencer Kellogg & Sons, Inc., Buffalo, N. Y.; Hartz; W. E. Flumerfelt, General Mills, Inc., Minneapolis; Sawyer; J. W. Moore, A. E. Staley Manufacturing Co., Decatur, Ill.; Hoehne.

Soybean Council of America, Inc., General Office for Europe, Via S. Nicolo da Tolentino 1, Rome, Italy. Dr. Fred R. Marti, general director.

Soybean Council of the United States, Spanish Office, Edificio Espana, Grupo 5, Planta 10, Despacho 3, Madrid, Spain. Don Javier de Salas, director general.

Soybean Council of the United States, Italian Office, Via S. Nicolo da Tolentino 1, Rome, Italy. Dominic Marcello, director general.

The Soybean Council of America, Inc., is a nonprofit organization representing all branches of the soybean industry including producers, grain dealers, processors, manufacturers, exporters and others interested in soybeans and soybean prod-

The Council was organized to further expand the markets for soybeans and soybean products and make them more profitable for everybody through education, research and promotion.

First activity of the Council was an agreement with Foreign Agricultural Service of the U. S. Department of Agriculture to employ P. L. 480 funds and funds contributed by the soybean industry for market development projects for soybeans and soybean products in European countries. First of such projects was initiated in Spain early in 1957, with projects in Italy following. A general office for Europe was opened in Rome, and offices for Spain and Italy have been opened in Madrid and Rome.

It was expected that similar programs might be undertaken in Asia and South America.

Other early activities may include grants and assistance to needed research projects in the United States on production, marketing and utilization.

Truck Dumper

Rail-car Dumper

Marine Leg and Pneumatic Barge Unloader

New Orleans Elevator handled 40 million bushels of soybeans in 1957

 modern equipment, huge capacity expedite Mid-Continent cargoes

The Public Grain Elevator at the Port of New Orleans moved a record 40,468,000 bushels of soybeans in 1957. Here is an unsurpassed facility for rapid, efficient handling of soybean shipments. It renders to the grain trade one of the most valuable services offered by any port. Modern installations include two large marine legs for unloading barges, supplemented by a pneumatic unloader, two rail-car dumpers and a truck dumper—all designed for more rapid grain unloadings with consequent savings in time and money.

30 YEARS of LECITHIN EXPERIENCE

Pioneers and Leaders in developing Lecithin Uses.

Leaders in Lecithin Sales

We enjoy the confidence of both Lecithin users and manufacturers.

Backed by a staff of competent technical men with practical Lecithin experience who KNOW Lecithin uses and manufacture.

Consult us on your Lecithin problems.

ROSS & ROWE, INC.

50 Church Street, New York 7, N. Y. Wrigley Bldg., Chicago 11, III.

JAPANESE AMERICAN SOYBEAN INSTITUTE

Address—Room No. 410, Nikkatsu International Bldg., No. 1, 1-chome Yurakucho, Chiyoda-ku, Tokyo, Japan.

Managing Director—Shizuka Hayashi.

The Japanese American Soybean Institute was formed early in 1956 as the operating agency for the market development project in Japan for soybeans being conducted by the American Soybean Association in cooperation with the Foreign Agricultural Service of the U. S. Department of Agriculture and utilizing P. L. 480 funds and funds contributed by the soybean industry in the United States and Japan.

Purpose of the project is to further the market for American soybeans and soybean products by bringing about a closer understanding between the Japanese and the American soybean industries.

A delegation of Japanese industry leaders toured the United States in August and September 1956 to observe firsthand U. S. soybean production and facilities for handling, processing and exporting soybeans. It is expected that other similar delegations will follow.

A similar American trade group returned the visit in late 1957, making a 3-week tour of the soybean industry in Japan and observing first-hand the problems of Japanese manufacturers in using U. S. soybeans in their food products.

The Institute sponsored exhibits of U. S. soybeans and soybean products at the International Trade Fair in Osaka, Japan, in 1956, in Tokyo in 1957, and Osaka in 1958.

With the Institute's sponsorship, the Food Life Improvement Association, a Japanese government agency under the Ministry of Agriculture, is holding promotional weeks for soybeans and soybean products in various important Japanese cities, with special sales of soybean products during the week.

And also under the Institute's sponsorship the Japan Nutrition Association, another governmental agency, is educating the government nutritionists in 800 public health centers in Japan concerning the nutritional value of soybeans and how to use them more effectively. The nutritionists in turn will give lessons and promote the use of soybean products in meetings with women's and farmers' associations and other consumer groups.

Additional educational and promotional work by the Institute includes participation in public meetings and the utilization of newspapers, magazines and radio, and translation of American soybean literature into the Japanese language.

The Institute in 1957 in cooperation with Agricultural Research Service of the U. S. Department of Agriculture, sent Dr. A. K. Smith, secialist with USDA's Northern Utilization and Development Branch, to Japan in the interest of wider usage of U. S. soybeans in Japanese foods.

The Institute has completed a movie film showing production and consumption of soybeans with emphasis on food uses. And it is cooperating with the University of Kyoto in a research study on the usage of U. S. soybeans in natto.

OILS BROKERS' ASSOCIATION, INC.

President-Cecil Bays, Cecil Bays & Co., 1135

W. Huntington Drive, Arcadia, Calif.

Vice President, Secretary-Treasurer—F. Gordon Nichol, Lacy-Logan Co., 153 Meadows Bldg., Dal-

las 6, Tex.

The National Fats and Oils Brokers' Association is a non-profit corporation formed for the purpose of creating and maintaining a high standard of ethics among commodity brokers and promoting a better relation and understanding between buyer and seller.

MIDSOUTH SOYBEAN AND GRAIN SHIPPERS ASSOCIATION

Office-Box 692, Blytheville, Ark.

President—J. P. Critz, Clarksdale Grain Elevator, Clarksdale, Miss.

Vice President—Albert Cravens, Missouri Soybean Corp., Caruthersville, Mo.

Secretary-Treasurer—Paul C. Hughes, Farmers Soybean Corp., Blytheville, Ark.

The Midsouth Soybean and Grain Shippers Association is made up of country shippers in the states of Missouri, Kentucky, Tennessee, Arkansos, Mississippi and Louisiana,

Purpose is to promote the common interests of the members and to bring about a better understanding between all segments of the grain trade in the Midsouth including farmers, country shippers, processors, exporters, and brokers.

ONTARIO SOYA-BEAN GROWERS' MARKETING BOARD

Office—Chatham, Ontario,

Chairman-Gilles DePutter, Appin.

Past Chairman—George Phillips, Muirkirk.

First Vice Chairman-A. E. Jolley, Chatham.

Second Vice Chairman—D. A. McLachlin, Tup-perville.

Secretary-Manager—K. A. Standing, Chatham, full time.

14,000 grower-members. Purpose to control marketing of soybeans in Ontario and regulate the sale. Does not conduct actual purchase and sale, though has powers to do so.

Financed by license fees paid by each grower according to the number of bushels of soybeans sold.

TAYLORVILLE, ILLINOIS: This is one of the largest and most modern soybean processing plants in the world. It is one of twelve Allied Mills' plants that are busy producing an ever increasing amount of WAYNE FEEDS—the brand that is more and more in demand.

The twelve Allied Mills plants are located throughout the Eastern two-thirds of the nation in order to give Wayne Feed Dealers prompt and efficient service. They can get the feeds they want when they want them.

Every Wayne Feed is tested and proved under practical farm conditions at the 620-acre Wayne Research Farm . . . then produced under exacting requirements for top performance in feedlots and poultry houses. That's why Wayne Feeds have "what it takes" to earn and hold satisfied customers.

No matter what kind of livestock or poultry operation you have, you can depend on Wayne Feeds for superior results. For complete information write to Allied Mills, Inc., 141 W. Jackson, Chicago, Illinois.

*Factory and warehouse stocks only, through Oct. 1, 1941; total stocks, Oct. 1, 1942, and subsequently.
**Crop of year listed first, e.g., the 1924 crop was 4,947,000 bushels. †Sum of stocks, production and imports. The "total supply" figures for years previous to 1942-43 are incomplete to the extent that they do not include stocks on farms, in country elevators, and at terminal markets. (Such stocks were not reported previous to Oct. 1, 1942.) Figures are not adjusted for new crop soybeans used in September. ‡Fed to livestock on farms where produced. §Data not available for years previous to 1931-32. Includes shipments to U. S. territories, 1937-38 through 1950-51. ¶Residual item, This includes saybeans fed to livestock other than on farms where the soybeans were produced. It may also include small quantities used for human food. Prior to 1931-32 it includes exports. Prior to 1931-32 it includes shipments to U. S. territories. The minus quantities shown for some years are explainable largely by unreported stocks (prior to October 1942) and by the use of new crop soybeans in September of year of production. 7* Factory and warehouse stocks only, through Sept. 30, 1941; total stocks, Sept. 30, 1942, and subsequently. 8* Less than 500 bushels. Source of data: Agricultural Marketing Service, U. S. Department of Agriculture.

Compiled from official records of the Dominion Bureau of Statistics. U. S. Department of Agriculture, Foreign Agricultural Service, Fats and Oils Division. *With the exception of the period 1943-45 when small quantities were grown in Manitoba and British Columbia, the production of soybeans in Canada has taken place in the province of Ontario. In 1956, 3,200 acres produced 32,000 bushels and in 1957 4,000 acres produced 48,000 bushels.

up to \$20 more per acre for less than 20c with

2½ Bushels More Yield. Inoculation with Legume-Aid increases soybean crop yields up to 2½ bushels and more per acre.

High Value Soil Enrichment.

Soybean seed inoculated with Legume-Aid Inoculant fixes nitrogen in amounts worth \$10 or more per acre.*

*Based on U.S. Government Figures

Costs Only Pennies. The cost of inoculating soybean or other legume seed with Legume-Aid is less than 20¢ per acre.

You'll find it always pays to inoculate with Legume-Aid. Your small investment pays for itself — 100 times over.

1/ Years shown refer to years of harvest. Southern Hemisphere crops which are harvested in the early part of the year are combined with those of the Northern Hemisphere harvested the latter part of the same year. 2/ Figures refer to harvested dates as possible. 3/ Preliminary. 4/ Average of less than 5 years. 5/ Acrage harvested for beans. 6/ Less than 500 acres. 7/ One year only. 8/ Unofficial estimate. 9/ Java and Madura only. 10/ Beginning with 1950 figures represent South Korea only. 11/ Purchases for export. Local consumption is small. 12/ Includes estimates for the above countries for which data are not available and for minor producing countries. Foreign Agricultural Service. Prepared or estimated on the basis of official statistics of foreign governments, other foreign source material, reports of U. S. Agricultural Attaches and other U. S. representatives abroad, results of office research, or other information. Prewar estimates for countries having changed boundaries have been adjusted to conform to present boundaries, except as noted.

20

• Magnified 6 times, these soybeans show the cracks (invisible to the naked eye) that admit disease organisms,

Your cracked soybean seed invites disease attack

The tiny cracks caused by harvesting make it easy for disease organisms to penetrate soybean seed. This can mean a costly percentage of seed that's killed before it sprouts—unless you insist on effective protection.

For a few cents an acre, treatment with Du Pont "Arasan" stops disease and helps your crop start clean and strong. It clings tight to seed, seals off cracks, controls seed rot, mildew, purple stain and other diseases.

Improve your stand and yield by asking your treater for "Arasan" on every bushel you plant. "Arasan" formulations are also available in handy sizes for on-the-farm treating. Inoculate just before planting for top return from both treatments.

On all chemicals, follow label instructions and warnings carefully.

THIS WE BELIEVE

It is our purpose continually to maintain a high level of efficiency in soybean processing; to develop new uses and new markets for soybean products; to employ the most practical and economical methods of transportation. Through the combination of these efforts we strive to narrow the spread between what a farmer receives for his products and what he pays for his feeds. We believe this is our challenge. It is a responsibility we accept.

Soybean processors and refinere serving agriculture and industry

1/ Oct. 1 stocks in all positions include only old crop soybeans. 2/ Owned by Commodity Credit Corporation in transit to ports. 3/ Imports negligible. 4/ Mostly quantity fed, but includes waste, loss, statistical errors in estimates. 5/ Partly estimated. Stocks, production and quantity used for seed estimated by crop reporting board; exports and quantity crushed from Bureau of the Census. U. S. Dept. of Agricultural Marketing Service.

We're located to give special service on SOYBEANS

(and we do)

To give you faster, easier, more convenient service, Cargill now has six modern soybean plants located in the heart of heavy soy production areas. Each plant is pledged to the highest standards of quality, dependability and service in keeping with the name *Cargill*. You'll find the plants in:

- Port Cargill, Minnesota
- Memphis, Tennessee
- Chicago, Illinois
- Cedar Rapids, Iowa
- Washington, Iowa
- Fort Dodge, Iowa

We invite you to inquire for our soybean bids and our soybean meal or oil quotations.

Cargill, Incorporated

* Estimated from reports on production of soy flour on basis that one bushel of soybeans will yield either 39 lbs. of low fat flour or 48 lbs. of full fat flour. † Based on 40 lbs. of soy flour per bushel of soybeans. Bureau of the Census no longer collects separate data on the production of full fat and low fat soy flour, but reports only total production.

Additional copies of the Soybean Blue Book may be purchased from the American Soybean Association, Hudson, Iowa, by members for \$2.

PRODUCTION, EXPORTS SOY FLOUR AND GRITS

Soy flour and grits: U. S. production and exports, 1935-57 (1,000 lbs.)

^{*} Based on reports of the Soy Flour Association supplemented by information furnished the War Food Administration by the industry for 1935-48 and the Bureau of the Census for 1949 to date. Data for 1935-41 are rough approximations used during the war years since no exact data were available. *Reported by the Bureau of the Census—not available prior to 1943. Thus the first figure is for January-September 1943 only. Includes exports under the Lend Lease program. *Shipments for military relief feeding furnished by the National Military Establishments for 1944-46 and by the Bureau of the Census for 1947. Beginning with January 1948 included with commercial exports. The export figures do not include purchases by the Military for its own use. Compiled by Agricultural Marketing Service, U. S. Department of Agriculture.

FATS AND OILS PRODUCTION

Estimated production of fats and oils from domestic materials and oil equivalent of exported domestic oilseeds, year beginning October 1957 with comparisons (million lbs.)

Toronto, Canada

Lubbock, Texas

Bloomington, Indiana

Indianapolis, Indiana

The majority of all soybean extraction capacity contracted for in this country since 1947 has been built by Chemical Plants Division of the Blaw-Knox Company. Each of these plants was designed and erected to incorporate the most advanced processes and equipment; each has exceeded performance guarantees. This is the quality of service that accounts for Blaw-Knox leadership in the design and construction of vegetable oil processing plants. We will welcome the opportunity to work with you.

^{*}Source: Agricultural Marketing Service, U. S. Dept. of Agriculture. Compiled as follows: Oct. 1933-May 1942 from Chicago Daily Trade Bulletin, June 1942 and subsequently from chicago Journal of Commerce. Monthly prices, Oct. 1933-Sept. 1939, are simple averages of daily quotations, net trackprice, monthly prices, Oct. 1939 and subsequently, are weighted averages of reported cash sales—computed by weighting daily selling price by number of carlots sold. *Season average prices 1933-34 through 1938-39, are simple averages of monthly prices; beginning with 1939-40 the season averages are weighted by the monthly volume of cash sales. /Five cars or less sold, subsequently prices may not reflect general price level as there is little or no trading at the terminal market.

1/ The prices shown from which the support levels were computed are comparable and parity prices originally reported as follows: 1941-49, August comparable price; 1950-55, parity prices as follows: 1950, August; 1951, January; 1952, November 1951; 1953, September 1952; 1954, December 1953; 1955, February 1955; 1956, January; 2/ Generally mid-September parity prices. 3/ State average prices weighted by sales to obtain national average. Prices for years in which there was a substantial volume of deliveries to CCC from loans and purchase agreements include an allowance for such deliveries valued at average loan rates. 4/ Practically all processor loans. 5/ Preliminary. 6/ Less than 500 bushels. Grain Division, Commodity Stabilization Service.

Note: Data are based on weekly reports of inspections by licensed grain inspectors for overseas export and do not include rail or truck movement to Canada or Mexico. In some cases the ultimate destination of soybeans exported is not shown on the inspection reports, therefore the quantity of each country may vary from official Census data which are based on custom declarations.

U. S. Department of Agriculture, Foreign Agricultural Service, Fats and Oils Division.

They're Making Molehills Out of Mountains

490 million bushels is a sky-touching mountain of soybeans, . . . or so it would have seemed a few years back. But the 1957 crop doesn't look nearly so huge with today's giant processing plants and broad, strong markets for soybean products.

ADM is proud as punch of its role in building the dynamic soybean industry. Its researchers always have done their share—and more—to create new demand for soybeans. Continuous solvent extraction processing — which revolutionized the crushing industry — was introduced in this country by ADM . . . 50% protein meal . . . numerous industrial and bakery products made from soy flour . . . and scores of new uses for soybean oil . . . all of these are the result of ADM's never-ending search to harness the tremendous potential of the soybean.

These, too, are examples of how we carry out our working principle at Archer-Daniels-Midland—

"Creating New Values From America's Harvests."

ArcherDanielsMidland

OTHER ADM PRODUCTS: Linseed, Soybean and Marine Oils, Paint Vehicles, Synthetic and Natural Resins, Fatty Acids and Alcohols, Hydrogenated Glycerides, Sperm Oil, Foundry Binders, Industrial Cereals, Vegetable Proteins, Wheat Flour, Dehydrated Alfalfa, Livestock and Poultry Feeds.

OFFICIAL STANDARDS FOR SOYBEANS

Revised effective Sept. 1, 1955

Sec.

26.601 Terms defined.

26.602 Principles governing application of standards.

26.603 Grades, grade requirements, and grade designations.

AUTHORITY: § § 26.601 to 26.603 issued under sec. 8, 39 Stat. 485; 7 U. S. C. 84. Interpret or apply sec. 2, 39 Stat. 482, as amended; 7 U. S. C. 74.

- § 26.601 **Terms defined.** For the purposes ς^{ϵ} the official Grain Standards of the United States for soybeans:
- (a) Soybeans. Soybeans shall be any grain which consists of 50% or more of whole or broken soybeans which will not pass readily through an 8/64 sieve and not more than 10% of other grains for which standards have been established under the United States Grain Standards Act
- (b) Classes. Soybeans shall be divided into the following five classes: Yellow soybeans, green soybeans, brown soybeans, black soybeans, and mixed soybeans.
- (c) Yellow soybeans. Yellow soybeans shall be any soybeans which have yellow or green seedcoats, and which in cross section are yellow or have a yellow tinge, and may include not more than 10% of soybeans of other classes.
- (d) **Green soybeans.** Green soybeans shall be any soybeans which have green seedcoats, and which in cross section are green, and may include not more than 10% of soybeans of other classes.
- (e) **Brown soybeans.** Brown soybeans shall be any soybeans with brown seedcoats, and may include not more than 10% of soybeans of other classes.
- (f) Black soybeans. Black soybeans shall be any soybeans with black seedcoats, and may include not more than 10% of soybeans of other classes.
- (g) Mixed soybeans. Mixed soybeans shall be any mixture of soybeans which does not meet the requirements of the classes yellow soybeans, green soybeans, brown soybeans, or black soybeans. Bicolored soybeans shall be classified as mixed soybeans.

- (h) **Grades.** Grades shall be the numerical grades, sample grade, and special grades provided for in § 26.603.
- Bicolored soybeans, Bicolored soybeans shall be soybeans with seedcoats of two colors, one of which is black or brown.
- (j) **Splits.** Splits shall be pieces of soybeans that are not damaged.
- (k) **Damaged kernels.** Damaged kernels shall be soybeans and pieces of soybeans which are heat-damaged, sprouted, frosted, badly ground-damaged, badly weather-damaged, moldy, diseased, or otherwise materially damaged.
- Heat-damaged kernels. Heat-damaged kernels shall be soybeans and pieces of soybeans which are materially discolered and damaged by heat.
- (m) Foreign material. Foreign material shall be all matter, including soybeans and pieces of soybeans, which will pass readily through an 8/64 sieve and all matter other than soybeans remaining on such sieve after sieving.
- (n) **Stones.** Stones shall be concreted earthy or mineral matter and other substances of similar hardness that do not disintegrate readily in water.
- (a) 8/64 sieve. An 8/64 sieve shall be a metal sieve 0.032 inch thick perforated with round holes 0.125 (8/64) inch in diameter with approximately 4.736 perforations per square foot.
- § 26.602 Principles governing application ϵ f standards. The following principles shall apply in the determination of the classes and grades of soybeans:
- (a) Basis of determination. Each determination of class, splits, damaged kernels, and heatdamaged kernels, and of black, brown, and/or bicolored soybeans in yellow or green soybeans, shall be upon the basis of the grain when free from foreign material. All other determinations shall be upon the basis of the grain as a whole.
- (b) **Percentages.** All percentages shall be upon the basis of weight. The percentage of solids shall be expressed in terms of whole percents. All other percentages shall be expressed in terms of whole and tenths percents.
- (c) **Moisture.** Moisture shall be ascertained by the air-oven method prescribed by the United States Department of Agriculture, as described in

				Max	imum limits o		Brown, black, and/or bicolored	
Grade	Minimum test bushel per bushel Pounds	Moisture Splits		Damaged kernels Heat Total damaged %		Foreign material	soybeans in yellow or

3† 4‡	52 49	16.0 18.0	30 40	5.0 8.0	1.0 3.0	3.0 5.0	5.0 10.0	

Sample grade: Sample grade shall be soybeans which do not meet the requirements for any of the grades from No. 1 to No. 4, inclusive; or which are musty, sour, or heating; or which have any commercially objectionable for

† Soybeans which are purple mottled or stained shall be graded not higher than No. 3. ‡ Soybean® which are materially weathered shall be graded not higher than No. 4.

STANDARDS FOR SOYBEANS—(Continued)

Service and Regulatory Announcement No. 147, issued by the Agricultural Marketing Service, or ascertained by any method which gives equiva-

lent results.

(d) Test weight per bushel. Test weight per bushel shall be the weight per Winchester bushel as determined by the method prescribed by the United States Department of Agriculture, as described in Circular No. 921 issued June 1953, or as determined by any method which gives equivalent results.

§ 26.603 Grades, grade requirements, and grade designations. The following grades, grade requirements, and grade designations are ap-

plicable under these standards:

(a) Grades and grade requirements for soybeans (see also paragraph (c) of this section). (b) Grade designation. The grade designation for soybeans shall include in the order named the number of the grade or the words "Sample grade," as the case may be; the name of the class; and the name of each applicable special grade. In the case of mixed soybeans the grade designation shall also include, following the name of the

class, the approximate percentages of yellow, green, brown, black, and bicolored soybeans in the mixture.

(c) Special grades, special grade requirements and special grade designation for soybeans—(1) Garlicky soybeans—(i) Requirements. Garlicky soybeans shall be soybeans which contain 5 or more garlic bulblets in 1,000 grams.

(ii) Grade designation. Garlicky soybeans shall be graded and designated according to the grade requirements of the standards applicable to such soybeans if they were not garlicky and there shall be added to and made a part of the grade designation the word "garlicky."

(2) Weevily soybeans—(i) Requirements. Weevily soybeans shall be soybeans which are infested with live weevils or other live insects

injurious to stored grain.

(ii) Grade designation. Weevily soybeans shall be graded and designated according to the grade requirements of the standards applicable to such soybeans if they were not weevily, and there shall be added to and made a part of the grade designation the word "weevily."

DEFINITION

The products shall be processed from high quality, sound, clean, dehulled yellow soybeans as defined in the United States Grain Standards Act. The soybeans shall be subjected to a thorough initial cleaning operation that shall satisfications remove all foreign material. Disagreeable flavors and odors shall be removed

by subjecting the soy material to adequate processing.

Soy flour shall be prepared and packaged under modern sanitary conditions.

The soy flour shall be free from burnt, musty, rancid or other undesirable flavors or odors; free from burnt, scorched, or grayish color; and free from insects, insect webbing, dirt or other extraneous matter.

SOYBEAN DISEASES

Soybean diseases and control practices
Symptoms

Disease	Cause"	Symptoms	Control
Bacterial blight	В	Angular yellow spots on leaves, later turning brown. Leaves may appear torn or shredded.	Rotation, Fall plowing, Hawk- eye** and Flambeau** are less susceptible. Use disease-free seed.
Bacterial pustule	В	Similar to bacterial blight. Very small pustules develop in the center of each lesion.	Rotation. Fall plowing. CNS*** and Lee*** are highly re- sistant and Ogden*** is re- sistant. Use disease-free seed.
Wildfire	В	This disease occurs with bacterial pus- tule. It is a secondary parasite and forms large, bright yellow halos around the dead areas of leaf tissue.	Same as for bacterial pustule.
Brown stem rot	F	Brown discoloration of pith in lower stem which gradually spreads upward. In advanced stages, leaf tissue between veins turns brown, followed by death of the entire leaf.	Use a 4-year crop rotation. Complete plowing under of all crop refuse.
Stem canker	F	Brown to black lesions girdling stems, followed by death of plants in latter half of season.	Use disease-free seed. Com- plete plowing under of all crop refuse. Crop rotation.
Pod and Stem blight	F	Numerous small, black fruiting bodies appear on stems and pods. On pods the bodies are scattered, while on stems they occur in rows.	Same as for stem canker.
Frog-eye	F	Leaf spots with a grey-to-tan central area bordered by a narrow darker, purplish margin. Leaves may fall with heavy infection.	Wabash**, Lincoln**, Clark**, Lee***, Dorman***, and Jack- son*** are resistant. Crop ro- tation and disease-free seed.
Brown spot	F	Angular brown spots occur on lower leaves early in the season. Heavily spotted leaves turn yellow and fall.	Crop rotation.
Target spot	F	Reported only in Southern states, Red- dish-brown spots from pinpoint size to over ½ inch. Larger spots have con- centric rings of dead tissue.	Lee***, Jackson***, and Og- den***, have moderate re- sistance. Crop rotation and plowing under of crop refuse.
Phyllosticta leaf spot	F	In the North Central states young plants have """ shaped spots at tips of leaves or along the margins that may spread over most of the infected leaves. In the East, older plants are infected and spots also occur on stem and pods.	Plow under all crop refuse in the fall.
Downy mildew	F	Yellowish-green spots on the upper sur- face of leaves that later turn brown. A gray mold grows on the bottom side of the spots. Mature seeds are encrusted with light gray spores.	Resistant varieties may be available depending on the race of the fungus present.
Phytophthora root and stem rot	F	Rotting of roots and lower stems. Dark spots occur on the lower stems in advanced stages. Plants may eventually die. Disease occurs primarily in Ohio but has been reported in other states.	Mukden**, Monroe**, Black- hawk**, Harly**, Illini**, A. K.**, Dorman***, Arksoy***, and CNS*** are resistant.
Damping-off, root rots	F	Seeds may rot, stand is thin, seedlings die. Roots and base of stem are brown or reddish-brown and rotted. Diseased plants are later markedly stunted.	Use good quality seed of high germination. Plant in well-drained soil. Crop rotation.
Purple seed stain	F	Purple discoloration of seed. Seed quality is lowered. Also produces a spotting and discoloration of leaves, stems and pods.	Lee*** is resistant. Plant disease-free seed. Plow under crop refuse in fall.
Potash deficiency	Р	Yellowing and firing of leaves around edges. Can affect fully developed leaves.	Application of a fertilizer high in potash.
Iron deficiency	Р	Yellowing of youngest leaves as they are unfolding. Fully developed leaves remain green. Common in soils high in lime.	Apply water solution of 10 pounds per acre of ferrous sulfate sprayed on plants as soon as symptoms are evident.
	ema- todes	Galls form on roots. Plants become light green or yellow. Marginal firing may occur on edges of leaves. Slight or severe stunting may occur. Does not occur in North Central states.	Crop rotation.

Disease

SOYBEAN DISEASES—(Continued)

		SO I DENTIL DISENSES (COURT	
Soybean mosaic	٧	Leaves are distorted and may be nar- rower than normal with edges cupped downward. Plants are frequently stunted. Symptoms most severe on vegetable soy- beans. Several species of aphids trans- mit this virus.	Virus is seed transmitted; plant virus-free seed. Control aphids by spraying. If infected plants are few, they can be rogued.
Yellow mosaic	٧	A yellow mottle appears in scattered spots on the younger leaves. Sometimes an indefinite yellow band appears along the major veins.	Infection is usually less than 1%. Disease has little effect on yield. Virus is not seed-borne and no insect vector is known.
Bud blight	٧	Tip of stern killed and curved when young plants are infected. Plants may be dwarfed and produce little seed. Pods are abnormal, sometimes spotted, and may fall when young. Plants re-	The virus is seed transmitted; plant virus-free seed.

main green when normal plants mature. Herbicides such as 2,4.D and related compounds produce symptoms very simi-lar to soybean mosaic. Injury is ap-Herbicide injury

parent along sprayed roadsides and near sprayed grain fields.

Yield loss will be very light if leaves only are affected. If stems are twisted or gnarled loss will be heavier.

*B—bacteria; F—fungus; V—virus; P—Physiological. *** Variety adapted to the South only. **Variety adapted to the North only.

LEADING SOYBEAN VARIETIES

Characteristics and performance of most widely grown varieties. List prepared by agronomists in soybean producing states.

NORTHERN VARIETIES

(Listed in order of maturity)

Acme is approximately 10 days earlier than It has gray pubescence (short hairs Flambeau. on stems, leaves and pods), purple flowers and yellow seed and hilum (seed scar). Normally two to three seeds per pod. Grows erect, strong straw.

Flambeau, developed by the Wisconsin Agricultural Experiment Station from a Russian intro-duction; released in 1944; the earliest maturing recommended variety grown in the United States. Brown pubescence, purple flowers, yellow seeds with a black hilum.

Goldsoy, developed by the Ontario Agricultural College as a selection from O.A.C. No. 211; released about 1940; matures 2 days later than Flambeau; characterized by poor resistance to lodging. Gray pubescence, purple flowers, yellow seeds with a yellow hilum,

Norchief, developed by the Wisconsin Agricultural Experiment Station in cooperation with the U. S. Regional Soybean Laboratory from the cross Flambeau x Hawkeye; released in 1954; matures I day later than Goldsoy; an erect, high-yielding, high-oil-content variety for the far northern United States. Brown pubescence, purple flowers, yellow seeds with a black hilum.

Comet, developed by the Division of Forage Plants, Central Experimental Farm, Ottawa, Ontario, Canada, from the cross Pagoda x Mandarin: released in 1954; matures 2 days later than Norchief. Gray pubescence, purple flowers, yellow seeds with a yellow hilum.

Grant, developed by the Wisconsin Agricultural Experiment Station in cooperation with the U.S. Regional Soybean Laboratory, from the cross Lincoln x Seneca; released in 1955; matures 2 days later than Comet; a high-yielding, high-oilcontent variety with medium lodging resistance. Light brown pubescence, white flowers, yellow seeds with a black hilum.

Mandarin (Ottawa), developed by the Central Experimental Farm, Ottawa, Ontario, Canada, as a selection from Mandarin; released about 1930; matures at the same time as Grant. Gray pubescence, purple flowers, yellow seeds with a yellow hilum.

Hardome, developed by the Dominion Experimental Farm, Harrow, Ontario, Canada, from the backcross Mandarin x (Mandarin x A.K.); leased in 1953; matures at the same time as Grant and Mandarin (Ottawa). Gray pubescence, purple flowers, yellow seeds with a gray hilum,

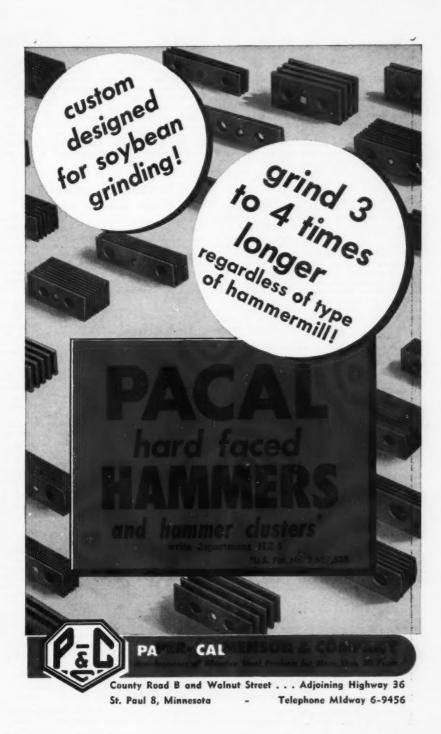

Capital, developed by the Central Experimental Farm, Ottawa, Ontario, Canada, from the cross of strain No. 171 x A.K. (Harrow); released in 1944; matures 1 day later than Grant; has tendency to lodge. Brown pubescence, purple, flowers, yellow seeds with a light brown hilum.

Chippewa, developed by the Illinois Agricultural Experiment Station in cooperation with the U.S. Regional Soybean Laboratory from the backcross Lincoln x (Lincoln x Richland); released in 1954; matures 2 days later than Capital; has high yield and high oil content with good resistance to lodging and good seed quality. Brown pubescence, purple flowers, yellow seeds with a black hilum.

Renville, developed by the Minnesota Agricul-tural Experiment Station in cooperation with the U. S. Regional Soybean Laboratory from the backcross Lincoln x (Lincoln x Richland); released in 1952; matures at the same time as Chippewa. Gray pubescence, white flowers, yellow seeds with a light brown hilum.

Harly, developed by the Dominion Experimental Farm, Harrow, Ontario, Canada, from the cross Mandarin x A.K. (Harrow); released in 1948; matures 1 day later than Renville; a tall variety with good lodging resistance and good seed quality, but with low oil content. Gray pubescence, purple flowers, yellow seeds with a yellow hilum

Monroe, developed by the Ohio Agricultural Experiment Station in cooperation with the U. S. Regional Soybean Laboratory from the cross Mukden x Mandarin; released in 1949; matures 2 days later than Harly. Gray pubescence, white flowers, yellow seeds with a yellow hilum.

NORTHERN VARIETIES— (Continued)

Bieckhawk, developed by the lowa Agricultural Experiment Station in cooperation with the U.S. Regional Soybean Laboratory from the cross Mukden x Richland; released in 1951; matures 2 days later than Monroe. Gray pubescence, white flowers, yellow seeds with a light brown hilum.

Earlyana, developed by the Purdue Agricultural Experiment Station as a selection from a natural cross in the Dunfield variety; released in 1943; matures 2 days later than Blackhawk; has a tendency to lodge excessively. Brown pubescence, purple flowers, yellow seeds with a yellow hitum.

Herosoy, developed by the Dominion Experimental Station, Harrow, Ontario, Canada, from the backcross Mandarin x (Mandarin x'A.K.); released in 1951; matures 1 day later than Earlyana; characterized by consistently high yield in its area of adaptation. Gray pubescence, purple flowers, yellow seeds with a yellow hilum.

Hawkeye, developed by the lowa Agricultural Experiment Station in cooperation with the U. S. Regional Soybean Laboratory from the cross Mukden x Richland; released in 1948; matures 3 days later than Harosoy; characterized by good yield, exceptionally high lodging resistance, good seed quality, and high oil content. Gray pubescence, purple flowers, yellow seeds with a black hilum with brown outer ring.

Harman, developed by the Dominion Experimental Farm, Harrow, Ontario, Canada, as a selection from the variety Manchu; released in 1944; matures about the same time as Hawkeye. Brown pubescence, purple flowers, yellow seeds with a black hilum.

Adams, developed by the lowa Agricultural Experiment Station in cooperation with the U. S. Regional Soybean Laboratory from the cross Illini x Dunfield; released in 1949; matures 3 days later than Hawkeye; very high oil content and good yield. Gray pubescence, white flowers, yellow seeds with a light brown hilum.

Lincoln, developed by the Illinois Agricultural Experiment Station in cooperation with the U. S. Regional Soybean Laboratory from the cross Mandarin x Manchu; released in 1944; matures 3 days later than Adams. Brown pubescence, white flowers, yellow seeds with a black hilum.

Clark, developed by the Illinois Agricultural Experiment Station in cooperation with the U. S. Regional Soybean Laboratory from the backcross Lincoln x (Lincoln x Richland); released in 1953; matures 5 days later than Lincoln; characterized by exceptionally high yield in its area of adaptation, with good resistance to lodging and good oil content. Brown pubescence, purple flowers, yellow seeds with black hilum.

Wabash, developed by the Purdue Agricultural Experiment Station in cooperation with the U. S. Regional Soybean Laboratory from the cross Dunfield x Mansoy; released in 1949; matures a day later than Clark. Gray pubescence, white flowers, yellow seeds with a light brown hilum.

Chief has averaged approximately a week later in maturity than Lincoln, grows tall and is characterized by relatively poor resistance to lodging, gray pubescence, purple flowers, and normally two- to three-seeded pods. Chief beans are straw yellow and have a slate-colored hilum with a brown outer ring.

Perry, developed by the Purdue Agricultural Experiment Station in cooperation with the U. S. Regional Soybean Laboratory from the cross Patoka x L37-1355; released in 1952; matures 5 days later than Wabash. Gray pubescence, purple flowers, yellow seeds with a black hilum with brown outer ring.

SOUTHERN VARIETIES

(Listed in order of maturity)

Dormen has averaged 7-10 days later than Perry and 14-18 days earlier than Ogden. Dorman is best adapted on the heavy clay Mississippi Delta soils of southeastern Missouri, Arkansas, Mississippi, and northeast Louisiana. It is also well adapted for production in the northeast quarter of Oklahoma, western Tennessee, and in the Coastal Plain area of Virginia. In these areas, Dorman yields will equal or surpass those for Ogden.

In its area of best adaptation, Dorman is of moderate height, but as it is moved farther north it grows taller and lodging is increased. In the Ohio Valley of Kentucky and on the eastern shore of Maryland, lodging is frequently greater than is desired unless planting rate is held down to six to nine seeds per foot of row. Dorman holds it seed well, has yellow seed of excellent quality and is high in oil content. The plants have heavy foilage and medium-sized stems, which dry out uniformly at maturity.

The primary advantage of an early variety such as Dorman, where later varieties can be grown, is to lengthen the harvest period and thus permit harvesting a greater acreage per combine. Production of varieties differing in maturity also distributes weather hazards of production and harvesting.

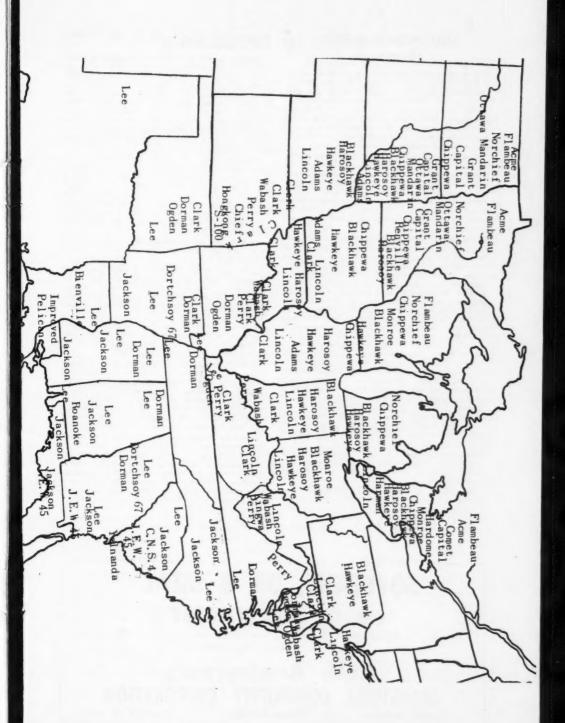

Dorman has white flowers, gray pubescence, a light pod wall and the seed has a light brown hilum.

\$-100 is comparable to Dorman in maturity. It has given its best performance in southeastern Missouri. In more southern or eastern areas, S-100 has a tendency to produce plants with heavy stems which remain green after the seed is mature. This causes difficulty in combining. Its tall, narrow growth type does not shade out weed growth during the latter part of the growing season. S-100 averages lower in oil content than any other commonly grown varieties. Seed quality is frequently very poor. S-100 has white flowers, gray pubescence, a dark gray pod wall, and the seed has a brown hilum.

Dortchsoy 67 averages approximately 5 days later in maturity than Dorman. Dortchsoy 67 is, in general, adapted to the same production area as Dorman. In the Delta area of Arkansas and Mississippi, Dortchsoy 67 will usually yield slightly

BEST ADAPTED VARIETIES

The map on opposite page shows the latest recommendations of agronomists in the soybean growing regions of the United States. Do not plant varieties north or south of their recommended latitudes.

SOUTHERN VARIETIES (Continued)

less than Dorman on the heavy clay soils but slightly more than Dorman on the lighter drouthier soils. It has heavy foilage and gives good ground cover during the growing season. Stems are of moderate size. Seed is yellow and usually of good quality. Dortchsoy 67 does not hold its seed as well as Dorman. Dortchsoy 67 has white flowers, gray pubescence, a dark gray pod wall, and seed has a light brown hilum.

Ogden has been the most widely grown variety in the South but has been largely replaced by newer varieties. Under dry conditions, Ogden shatters readily. Seed of Ogden has green seed-coats which are not desired by some foreign markets. The moderate height of Ogden makes it easy to combine. Its heavy foliage aids appreciably in keeping down late-season weeds and grasses.

The Ogden selections Dortchsoy 2 and Hale Ogden 2 are similar to the Ogden variety. Ogden has purple flowers, gray pubescence, a dark gray pod wall and the seed has a dark brown hilum.

Lee is similar in plant type to Ogden, but averages 5-7 days later in maturity. Lee is surerior to Ogden in seed holding, seed quality, and seed yield. It has shown very little shattering 8 to 10 weeks after maturity. It is resistant to the diseases bacterial pustule, wildfire, frageye, and purple seed stain. It is moderately resistant to the leaf disease target spot.

Lee is adapted to the same general area as where Ogden has been grown, except that its superior seed-holding qualities will permit it to be grown on the high plains of Texas and the irrigated valleys of southern California and Arizona. Lee will be rather short for production on the lighter soils of south Alabama and west Florida and for planting after grain in the Coastal Plain soils of South Carolina and Georgia.

Lee has purple flowers, tawny pubescence, a light tan pod wall, and the seed is yellow with a black hilum.

Roanoke averages 7-9 days later than Lee and grows 8-10 inches taller. In areas where Lee makes adequate growth, Roanoke will average lower in yield.

Because of its taller growth, Roanoke is preferable to Lee on the lighter soils of south Alabama and west Florida and in extremely late plantings in more northern areas.

Roanoke has white flowers, gray pubescence,

a dark gray pod wall, and the seed is yellow with a light brown hilum.

Jackson is well adapted for production in south Mississippi, south Alabama, west Florida, and the Upper Coastal Plain soils of North Carolina, South Carolina and Georgia. Jackson is 1 or 2 days later than Roanoke and 10 days later than Lee. It grows slightly taller, but stands better than Roanoke. In its area of best adaptation, Jackson will usually yield slightly more than Lee and its taller growth permits greater ease in combining. Jackson is well suited for growing after oats or lupines.

Jackson yields well in the Delta area, but its taller growth makes it more difficult to combine than Lee. It is moderately resistant to target spot, and has moderate resistance to some strains of root knot nematodes, Jackson will usually hold its seed very well for several weeks after reaching combine maturity, but under drouthy conditions on light soil, it has shown some tendency to shatter.

Jackson has white flowers, gray pubescence, a dark gray pod wall, and the yellow seed has a brown hilum.

CNS matures approximately 3 days later than Jackson. Seed yield is usually less than that for Lee or Jackson, except in central Florida. CNS holds it seed quite well. Seed is much lower in oil content than other commonly grown varieties.

CNS-4 is similar in its characteristics and performance to CNS, except that seed of CNS has a brown hilum and CNS-4 has a black hilum. Both strains are of moderate height.

CNS-24, or sometimes referred to as Clemson Strain 24, is similar to CNS in maturity and many of its characteristics, but grows much taller.

J.E.W. 45 matures 6-8 days later than Jackson. It makes moderate growth and produces good seed yields in the lower Southeast. J.E.W. 45 has purple flowers, tawny pubescence, a light tan pod wall, and has yellow seed with a brown hilum.

Improved Pelican is a late-maturing, rank growing variety developed primarily to produce a heavy tonnage of green material for turning under in sugar cane fields. Because of its rank growth, Improved Pelican is difficult to combine, especially if planted too early. When planted in late June or early July, Improved Pelican can be combined with greater ease and will produce good yields of high quality seed. It has purple flowers, tawny pubescence, a brown pod wall, and yellow seed with a brown hilum.

SOYBEANS, OIL & MEAL PRICE SPECIALISTS

We welcome the opportunity to show you how you can make profitable application of our work in your organization

25th Anniversary INDUSTRIAL COMMODITY CORPORATION

122 East 42nd Street

OXford 7-0420

New York 17, N. Y.

PROCESSORS OF SOYBEANS

Officers of firms are listed as follows: (1) president; (2) vice president; (3) secretary; (4) treasurer; (5) head soybean buyer; (6) oil sales manager; (7) plant superintendent; (8) meal sales manager; (9) plant manager. Brand names are in quotation marks. Type of processing equipment, tons per day, processing capacity, total storage capacity, phone numbers, and rail-roads serving the individual plant are listed. Information was obtained through questionnaires sent directly to processing companies. listings are as complete as it was possible to assemble. They contain all available information but the publishers of the Soybean Blue Book will not be responsible for any omissions which may have been unavoidably made. Established policy of some firms makes unavailable more complete information than is carried in this directory.

ALABAMA

Dothan—DOTHAN OIL MILL CO., P. O. Drawer 458. Ph, LD I, 28800, 30900, 39840. (1) J. B. Roberts; (2) W. T. Street; (3, 4) W. D. Malone; (5) J. H. Bryson, Jr.; (6, 8) R. B. Bryson; (7) E. L. Dillard. 2 screw pr., Anderson Exsolex process, hexane solv., cap. 90 t. Storage cap. 4,000 f. Served by ACL, CG, A65A RR.

Foley—BALDWIN OIL MILLS, INC. Ph. 8901. Affiliate of Sessions Co. (1) H. M. Sessions; (2, 5, 6, 8, 9) E. E. Purvis; (3, 4) Paul Kaiser, Jr.; (7) Harold Adcock. Hexane solv., cap. 65 t. Storage cap. 198,000 bu. "Baldwin Oil Mills" soybean oil meal; "Gateway" mixed feeds. Served by L&N RR.

Montgomery 1—BUCKEYE CELLULOSE CORP. Dist. mgr., J. M. Sewell; (7) P. W. Anderson.

Selma — BUCKEYE CELLULOSE CORP. Dist. mgr., J. M. Seymour; (7) D. T. Thompson.

ARIZONA

Gilbert—VEGETABLE OIL PRODUCTS CO., INC., cottonseed oil mill div. Ph. Woodland 48678. (2, 5, 6, 7, 9) M. H. Connley. 4 exp., cap. 50 t. Storage cap. 60,000 bu. "Sun Ripe" soybean oil meal and pellets. Soybean operations 3,000 t. annually. Served by SP RR.

ARKANSAS

Blytheville—SWIFT & CO. Main office Chicago. (7) L. S. Janet; (9) J. E. Dicks, "Swift's" soybean oil meal.

Fort Smith—FORT SMITH COTTON OIL CO., INC., S. 6th and I St., P. O. Box 819. Ph. Su 2-0351. (1, 9) W. H. Lillard; protein sales, Mrs. Bess Hamil; mixed feed plant gen. supt., W. A. Pugh; asst. supt., Burl Blackshire; supt. soybean mill, Geo. Wasson. 6 exp. and 16 hydraulic pr. "Titsworth" mixed feeds. On MP and SLSF RR sidings.

Little Rock—BUCKEYE CELLULOSE CORP. Dist. mgr., F. H. Jarrell; (7) J. M. Johnson.

Little Rock—ROSE CITY COTTON OIL MILL
CO., P. O. Box 950. Ph. WI 5-2361. Office,
4119 E. Broadway, North Little Rock. (1) A. B.
Cobb; (2) W. G. Alexander; (3) W. F. Bates; (4)
W. M. Bruce, Jr. 3 Fr. screw pr., cap. 65 t.
Storage cap. 150,000 bu. "Sure Shot" soybean
oil meal. Served by MP, CB, RI RR.

Little Rock—SOUTHERN COTTON OIL DIV., Wesson Oil & Snowdrift Co., Inc. Ph. 27-9277; LD 11, 144, 159. Main office New Orleans. (7) R. R. Castillow; (9) C. M. Smith. 6 exp. "Sco-Co" soybean oil meal. Served by MP RR.

Newport—SOUTHERN COTTON OIL DIV., Wesson Oil & Snowdrift Co., Inc. Ph. 872; LD 9, 5. Main office New Orleans. (7) N. L. Pugh, Jr.; (9) J. H. Jeffery. 6 Anderson exp. and French hexane solv. Served by MP RR.

Ösceola—OSCEOLA PRODUCTS CO. (1) D. S. Laney; (2) C. F. Tompkins; (3) W. O. Frazier; (7) O. M. Beckham; (9) F. H. Ferrell. Allischalmers hexane solv., cap. 125 t. Storage cap. 800,000 bu. "Osceola" soybean oil meal and pellets. Served by SLSF RR.

Pine Bluff—PLANTERS FERTILIZER & SOY-BEAN CO., 1021 E. 5th Ave. Ph. JE 4-3631. Mgr., Geo. H. Dunklin; asst. mgr., Wm. H. Dunklin; (7) B. T. Shepherd. Solv., cap. 150 t. Storage cap. 175,000 ba. "Razorback" soybean oil meal and pellets. Served by MP, SSW RR.

West Memphis—WEST MEMPHIS COTTON OIL MILL, P. O. Box 577. Ph. RE-53360. Affiliate of Perkins Oil Co., 727 Beale St., Memphis, Tenn. (1) T. C. Lee; (2) I. J. Lichterman; (3, 4) W. A. Loewenberg; (7) C. H. Caldwell; (8) H. D. Tobias; (9) H. H. Riggan. 4 screw pr., cap. 120 t. Storage cap. 750,000 bu. "Goldenrad" soybean oil meal. Served by SLSF, MP, RI RR.

Wilson—DELTA PRODUCTS CO., P. O. Box 197. Ph. 3761-71. (1) R. E. L. Wilson III; (2) John E. Crain; (3, 4) H. F. Ohlendorf; (5, 6, 8, 9) Ralph Woodruff; (7) Marshall Woodyard; asst, secy.-treas., Charles W. Bonner. Allis-Chalmers hexane solv., cap. 150 t. Storage cap., 600,000 bu. at Evadale. "Delpro" soybean oil meal. Soybean operations 15%. Served by DVGS RR.

Wilson—WILSON SOYA CO. Phone 2921, 2481.
(1) R. E. L. Wilson III; (2) R. E. L. Wilson, Jr.;
(3, 4) Hudson Wren; (5, 6, 8, 9) R. A. Pratt;
(7) C. W. Bilbe. Hexane solv., cap. 100 t.
Storage cap. 1,000,000 bu. "Wil-Soy" soybean oil meal and pellets. Served by SLSF RR.

CALIFORNIA

Los Angeles 58—CALIFORNIA COTTON OIL CORP., 2301 E. 52nd St. Ph. LU-36381. (1) W. B. Coberly, Jr.; (2) Leonard E. Read, Jr.; (2, 3, 5, 6) Wiley Blair, 3rd; (7) H. F. Crossno; (8) W. W. Kelley. 12 screw pr., cap. 240 t. Storage cap. 500,000 bu. "Calico" soybean oil meal; pellets. Sporadic soybean operations. Served by SP RR.

Los Angel·s 22—PACIFIC NUT OIL CO., 4615
Bandini Blv. Affiliate of California Cotton Oil
Corp., 2301 E. 52nd St., Los Angeles. Ph. LU36381. (1) W. B. Coberly, Jr.; (2) D. L. Allison;
(3, 5, 6) Wiley Blair, 3rd; (4) C. W. Allison;
(7) W. D. Horne. 8 exp., cap. 160 t. Storage
cap. 650,000 bu. Sporadic soybean operations.
Served by ATSF, UP RR.

Norwalk—LIBERTY VEGETABLE OIL CO., P. O. Box 125. Ph. Logan 5-3001 Los Angeles. Subsidiary of lowa Milling Co., Cedar Rapids, lowa. (1, 5, 6) 1. D. Sinaiko; (2) Joe Sinaiko; (3) Samuel Maslon; (4, 8, 9) Wm. Sinaiko; (7) Gordon Lamberton. 4 screw pr., cap. 85 t. Storage cap. 175,000 bu. "Liberty" soybean oil meal. Served by SP RR.

Oekland—ALBERS MILLING CO., 2700 7th St. Ph. Templebar 2-4750. Office 5045 Wilshire Blvd., Los Angeles 36. Subsidiary of Carnation Co. (1) F. W. Hoover; (2) E. W. Kelner; (2, 5, 8) G. H. Forney; (2, 8) T. V. Cox; (3) Wm. Stinehart; (4) H. E. Olson; (6) J. R. Faulconer; (9) F. Karlsrud. 6 exp., cap. 110 t. Storage car. 200,000 bu. "Albers" soybean oil meal, "Albers Quality Controlled" mixed feeds and pellets. Served by ATSF, SP, WP RR.

Richmend 4—PACIFIC VEGETABLE OIL CORP., 1145 5. 10th St. Ph. LA-44727. Main office, San Francisco. (6) R. W. Hammond; (9) E. W. Ferguson. 6 exp., cap. 150 t.; hexane solv., cap. 120/160 t. Storage cap. 126,000 bu. "PVO" soybean oil meal. Served by SP, ATSF RR.

San Francisco 7 — PACIFIC VEGETABLE OIL CORP., 62 Townsend St. Ph. Douglas 2-0990. Plant at 1145 S. 10th St., Richmond. Board chm., B. T. Rocca, Sr.; (1) B. T. Rocca, Jr.; asst. vice pres. mfg., E. A. Hill; (3) Jos. R. Smith; (4) Ford M. Tussing; (5, 8) James C. Taylor; (6) Richard W. Hammond. Storage cap. 368,000 bu.

Wilmington—VEGETABLE OIL PRODUCTS CO., INC., 401 Canal Ave. Ph. Terminal 47224; Los Angeles, Nevada 632-51. (1) R. J. Roesling; (2, 5, 6, 8) S. T. Pattison; (2, 5, 6, 9) W. L. Dickinson; (3, 4) W. L. Meyers; (6) D. Dangler; (7) L. D. Stewart. 4 exp., cap. 50 t. Storage cap. 60,000 bu. "Sun Ripe" soybean oil meal and pellets. Soybean operations 3,000 t. annually. Served by SP, UP, ATSF, HB RR.

DELAWARE

Millsbore—TOWNSEND'S INC. Ph. 2771. (1) Sen. John G. Townsend, Jr.; (2, 3, 4) Preston C. Townsend; (5, 6, 8, 9) John Phillips; (7) W. W. Ulrich. Hexane solv., cap. 50 t. Storage cap. 250,000 bu. "Townsend's Inc." soybean oil meal, mixed feeds and pellets.

FLORIDA

ROTEX

SCREENERS

GIVE PROFITABLE PRODUCTION

ROTEX Screeners are widely used for all types of screening operations throughout the soybean industry. Long known for accuracy and capacity, ROTEX make profitable operations out of such soybean screening applications as the;

rough cleaning and scalping of whole soybeans final cleaning of whole soybeans, through coarse and over fine screens

sizing of cracked soybeans

sizing of soybean meal, before and after grinding removal of dust from finished soybean meal.

These and other soybean screening operations are economical due to the ROTEX screening action. The nearly level, gyratory motion, pioneered by ROTEX, conveys materials rapidly over the screen surfaces with minimum vertical vibration or hop. This stratifies the material by particle size, rapidly passing undersize particles through the mesh openings. The results are clean separations of exacting accuracy coupled with high capacity. The bouncing action of rubber balls, contained beneath screen surfaces eliminates screen blinding and also aids stratification. Designed for operating convenience, ROTEX Screeners pay for themselves by the economies they effect.

WIDE SELECTION OF SIZES

To meet your requirements: 25 standard models—one to five screen surfaces—many semi-standard and special models.

Write for Bulletin 401 and information on your screening requirements. Our engineering staff will be pleased to cooperate with you.

Are You Cashing In On the Futures?

The futures market for soybean oils and meals is the best possible means for protecting your normal operating profit—regardless of changes in value of your inventory.

If you haven't explored the advantages of the futures market already—if you'd like complete details on just how you might use this market in your business — we'll be happy to have a Merrill Lynch man call at your own convenience and explain the subject in detail.

In the meantime, why not get a copy of our 64-page guide to the basic fundamentals of the futures market.

It's called "How To Hedge Commodities" and there's no charge, no obligation.

Milwaukee, Wis.—ALLIS-CHALMERS MFG. CO., gen. machinery div.

Milwaukee, Wis.—ARNOLD DRYER CO., 3000 W. Montana. Dehydrators.

Another Repeat Customer For

Aeroglide Grain Driers

The installation of a grain drier is a mighty important investment. The selection of the drier is a mighty important decision and one you will live with a long time. No matter what the grain you wish to dry, no matter what drying capacity you may require from 200 bushels per hour up to 5,000 bushels per hour, if you are looking for a drier that will give you the highest quality grain under all weather conditions . . . and one that will do it economically season after season with a minimum of attention, an Aeroglide Grain Drier will do the job best. See for yourself why Aeroglide is the "World's Finest Grain Drier."

CRIPPEN CLEANERS

Crippen Model MM-754-72
All metal construction

IDEAL FOR SOYBEAN PLANTS

Crippen equipment is engineered for efficient cleaning and increased output with fewer runs, cutting cleaning costs.

Compact in design they provide the biggest capacity for the smallest floor space. Crippen manufactures a full line of cleaners, scalpers, scarifiers, separators, polishers.

Clean Soybeans — Greater Profits

"Q" Type Soybean Master Cleaner

Monitor Separators

Are manufactured in sizes to provide for capacities from

70

to 7,000

bushels of small grain per hour Capacity range from 3,000 to 7,000 bushels of small grain per hour.

Soybean processors and grain handlers find this advanced design in receiving separators to be exceptionally efficient.

Special construction enables operator to secure 50% greater capacity than can be obtained with respective sixes in other types.

Salient features are heavy structural steel frames, fully ball bearing, positive cleaning device under all main and split screens.

Alhambra, Calif. - MOISTURE REGISTER CO., 1510 W. Chestnut St. Electronic moisture-testing

Fullerton, Calif. - SCIENTIFIC INSTRUMENTS DIV., Beckman Instruments, Inc., 2500 Fullerton Rd. "Beckman Automatic Titrator" for titrations in chemical laboratory; "Beckman pH Meters" for hydrogen-ion determinations; "Beckman UV, visible and infrared Spectrophotometers" for chemical analysis of soybean oil; "Beckman Aquameter" for moisture determination.

3 Sizes for Hull Removal

The Bauer Shaker-Aspirator is especially designed for removing the hulls from decorticated soybeans. Mechanical forces are combined to sift out the meat while the hulls are drawn off by air currents to be pneumatically conveyed to a cyclone collector.

Other Bauer equipment for the soybean processing industry comprises Disc Granulators, Scalping Shakers, Cleaners, Cake Breakers, Attrition and Hammer Mills, Permanent Magnetic Separators. All of these machines and devices are shown in our general catalog and in special bulletins.

We do not manufacture oil extraction equipment, but cooperate with companies offering hydraulic, continuous screw press, and solvent processes. Because of our specific knowledge concerning seed and nut processing, we understand how to fit our equipment into the complete processing system. You are invited to take advantage of our engineering services.

THE BAUER BROS. CO. 1744 Sheridan Ave., Springfield, Ohio

Columbian Steel Storage Tanks

less condensation • less sweating lower insurance

Besides all these principal features, Columbian Bolted Steel Tanks are fireproof . . . they never crack or crumble . . . no caulking or patching is required. Minimum maintenance demands only an occasional coat of paint. How long will they last . . . no one knows

. . none has ever worn out. Not one has been demolished by tornado or cyclone. Ideal for the safe, efficient storage of all small grains, they are perfect for the economical handling of wheat, corn, oats, barley, soya beans etc.

Furnished in single units or batteries. Delivered knocked down or completely erected. Write for your FREE copy of eight-page folder illustrating and describing these popular bolted steel grain elevators.

Construction Contractors
Of Concrete Stave
Storage Structures

Biggest Builders in the South the South and Southwest we — and Southwest

Throughout the South and Southwest we have built more concrete stave storage structures than any other firm in our field. And for the past 10 years, 40-percent of our annual business has come from those who already own one or more of our structures. Such satisfaction in our service is probably unmatched in the field of grain bins construction. From the moment we undertake a new job until the final stave is in place, the responsibility of quality in

WRITE FOR CATALOG

Our catalog is a folio of pictures showing many of the fine storage structures we have built for well known firm and individuals throughout the South and Southwest. A copy will be sent upon request—and without obligation.

Cleveland 2, Ohio-V. D. ANDERSON CO., 1990 W. 96th St. Designer and fabricator of complete petroleum and non-flammable type solvent extraction plants and equipment.

Pittsburgh, Pa. -- BLAW-KNOX CO., chemical plants div. Also Chicago 1, III. Complete process plants for the fatty oil industry.

Hamburg 13, Germany - EXTRAKTIONSTECH-NIK Henry Meyer, Werderstrasse 29. Designs and constructs solvent extraction, continuous screw presses, roller mills, degumming, neutralization, bleaching, hydrogenation, deodorization, recovery, all kinds of spare parts for oil mill industry.

From original design to final operation, Crown solvent extraction plants give you more

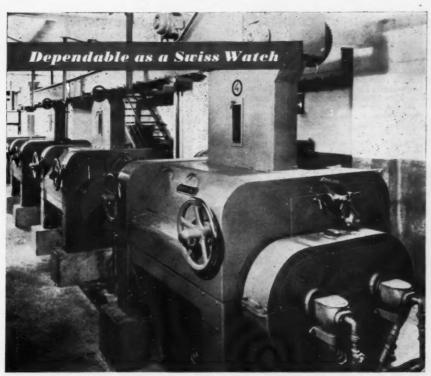

For complete details, send today for a free copy of the catalog "Crown Solvent Extraction Plants."

CROWN IRON WORKS CO.

1229 Tyler Street N. E. . Minneapolis 13, Minnesota

Battery of Model MAO Buhler Flaking Rolls

You'll find <u>Buhler-built</u> oil mills throughout the world

Buhler Offers:

- Complete line of seed cleaning equipment
- Complete line of seed preparation equipment such as high capacity cracking rolls, flaking rolls, crushers, etc.
- All mechanical and pneumatic handling equipment, including conveyors for unloading cars or ships
- BUHLER THERMO-PNEUMATIC . . . a pneumatic conveyor system which cools the conveyed product (for example: extraction meals) before packing or storing
- Full engineering service in modernizing or designing complete mills of all kinds

For information on how BUHLER Engineers, BUHLER Experience and BUHLER Equipment can help you increase the efficiency and output of YOUR mill, call or write . . .

Buhler Mill Engineering Co.

Buhler Brothers (Canada) Ltd.

4207 Nicollet Ave., Minneapolis, Minn. • Phone TA 5-8849 24 King Street West, Toronto, Ontario • Phone EM 2-2575

CONTINUOUS COUNTER-CURRENT SOLVENT EXTRACTORS

Chicago 15, III.—WURSTER & SANGER, INC., 1337 E. 52nd St. Complete continuous solvent extraction (Filtrex) plants.

Minneapolis 13, Minn.—CROWN IRON WORKS CO., 1229 Tyler St. N.E. Complete continuous-

solvent extraction plants.

Haddonfield, N. J.—STOCKDALE ENGINEERING
CO. P. O. Box 144. Affiliate of Extraction
Continue De Smet, Antwerp, Belgium. Distributor
of "De Smet" continuous solvent extraction plants
and auxiliary equipment.

West Orange, N. J.—YORK SEPARATORS, INC. Separator vessels for steam, gas, air and process

vapor streams.

Cleveland 2, Ohio—V. D. ANDERSON CO., 1990 W. 96th St. Designer and fabricator of complete petroleum and non-flammable type solvent extraction plants and equipment.

Pique, Ohio—FRENCH OIL MILL MACHINERY CO. Vertical, rectangular, and horizontal basket

extractors; solvent toasters.

Glen Riddle, Pa. — PITTOCK & ASSOCIATES. Used solvent extraction plants, Anderson and others.

Pittsburgh, Pa. — BLAW-KNOX CO., P. O. Box 1198. Also Chicago 1, III.

CONTINUOUS SCREW PRESSES

Cleveland 2, Ohio—V. D. ANDERSON CO., 1990 W. 96th St. Exclusive builder of "Expellers." Designer of complete oil mills.

Piquo, Ohio—FRENCH OIL MILL MACHINERY CO. Continuous screw presses.

Glen Riddle, Pa. — PITTOCK & ASSOCIATES. Anderson and French screw presses; continuous screw presses. Rebuilt for all oilseeds.

DEGUMMING

Chicago 15, III.—WURSTER & SANGER, INC., 1337 E. 52nd St. Complete degumming equipment.

Poughkeepsie, N. Y. — DE LAVAL SEPARATOR CO. Offices also at 427 Randolph St., Chicago 6, III., and 201 E. Millbrae, Millbrae, Calif.

Philadelphia 40, Pa.—SHARPLES CORP., 2300 Westmoreland St.

Pittsburgh, Pa. — BLAW-KNOX CO., chemical plants div. Also Chicago 1, 111.

DEODORIZATION

Chicago 15, III.—WURSTER & SANGER, INC., 1337 E. 52nd St. Complete batch and continuous, high vacuum deodorization plants.

Louisville 1, Ky.—GIRDLER PROCESS EQUIP-MENT DIV. Continuous and semi-continuous deodorization plants.

New York 17, N. Y.—INDUSTRIAL CHEMICAL SALES, 230 Park Ave., div. of West Virignia Puip & Paper Co. Offices at 35 E. Wacker Drive, Chicago 1, Ill.; Philadelphia National Bank Bldg., Philadelphia 7, Pa.; 2775 S. Moreland Blvd., Cleveland 20, Ohio. Activated carbon, refined and crude tall oils.

New York 38, N. Y.—L. A. SALOMON & BRO., 216 Pearl St. Activated carbon, bleaching clays.

New York 19, N. Y.—FOSTER WHEELER CORP., 666 5th Ave. Batch and continuous installations. Dowtherm systems.

Oreland, Pa.—ACME COPPERSMITHING & MA-CHINE CO. Deodorizers.

Pittsburgh, Pa. — BLAW-KNOX CO., chemical plants div. Also Chicago 1, III. Batch installations. Dowtherm heating systems.

Warren, Pa.—STRUTHERS WELLS CORP. Batch and continuous deodorizers. Heaters and coolers.

FRACTIONATION

Chicago, III.—ARMOUR CHEMICAL DIVISION, 1355 W. 31st St. Plant also at 47th St. and Lawndale Ave., McCook, III.

HYDRAULIC PRESSING EQUIPMENT

Piqua, Ohio-FRENCH OIL MILL MACHINERY CO.

HYDROGENATION

Chicago 15, III.—WURSTER & SANGER, INC., 1337 E. 52nd St. Complete hydrogenation, hydrogen gas producing and storage systems.

Louisville 1, Ky. — GIRDLER CONSTRUCTION DIV. "Hygirtol" hydrogen generating plants and hydrogenation facilities.

New York 19, N. Y.—FOSTER WHEELER CORP., 666 5th Ave. Hydrogenators.

Pittsburgh, Pa. — BLAW-KNOX CO., chemical plants div. Also Chicago 1, III.

Warren, Pa.—STRUTHERS WELLS CORP. Hydrogenators.

VENT VOLATILE VAPORS SAFELY WITH TOKHEIM FLAME ARRESTERS

UNDERWRITERS' APPROVED

WRITE BOX 67

CEDAR RAPIDS, IOWA

MARGARINE

Chicago 15, III.—WURSTER & SANGER, INC., 1337 E. 52nd St. Complete tropical margarine plants.

Louisville 1, Ky.—GIRDLER PROCESS EQUIP-MENT DIV. Complete margarine plants. Margarine manufacturing apparatus.

Saginaw, Mich—BAKER-PERKINS, INC., chemical machinery div. Mixing equipment, centrifugals.

Pittsburgh, Pa. — BLAW-KNOX CO., chemical plants div. Also Chicago 1, III.

MISCELLANEOUS

Fresno, Calif.—VALLEY FOUNDRY & MACHINE WORKS, INC., 2718 East Ave. Stainless steel tanks. Special equipment made to order.

Oakland 1, Calif. — DORR-OLIVER INC., 2900 Glascock St. Manufactures centrifuges used in all phases of soybean protein production.

San Francisco 10, Calif.—ENTERPRISE ENGINE & MACHINERY CO., 18th and Florida Sts. Subsidiary of General Metals Corp. Foots press—free oil extraction from foots.

Santa Rose, Calif.—RIETZ MFG. CO., 150 Todd Rd. Branch at West Chester, Pa. Manufacturer of equipment for food and chemical process industries. "Rietz" Disintegrators, Prebreakers and Thermascrews.

Waterbury 20, Conn.—BRISTOL CO., P. O. Box 1790-SB. Temperature recorders; pH measurement and control instruments.

Atlanta, Ga.—DAVIDSON-KENNEDY CO., 1090 Jefferson St. N. W., P. O. Box 97, Sta. D. Extractors, heat exchangers, condensers.

Chicago 50, III.—B. F. GUMP CO., 1309 S. Cicero Ave. Feeders.

Decatur, III. — LEADER IRON WORKS, INC., 2156 N. Jasper St. Affiliate of Standard Steel Corp., Los Angeles, Calif. Tanks, kettles, condensers, heat exchangers, rotary driers and coolers.

East Moline, III. — NIAGARA FILTERS DIV., American Machine & Metals, Inc.

East Moline, III.—TOLHURST CENTRIFUGALS DIV., American Machine & Metals, Inc. Centrifugal extractors.

Maywood, III.—COLEMAN INSTRUMENTS, INC., 318 Madison St. Manufactures "Coleman Model 6B Spectrophotometer" for evaluation of vegetable all color

Skokie 60, III.—POWERS REGULATOR CO., 3400 Oakton St. Temperature and humidity control systems for processing and space conditioning.

Cedar Rapids, Iewa—TOKHEIM CO., 1123 C Ave. NW, P. O. Box 67. Manufactures flame arresters.

Davenport, Iowa — DAVENPORT MACHINE & FOUNDRY CO., 1628 W. 4th St. "Rotary" driers, conditioners and coolers used in solvent extraction.

Minneapolis 13, Minn.—DAY CO., 810 3rd Ave. N.E. Soybean oil meal coolers.

Minneapolis, Minn. — MIAG NORTHAMERICA, INC., 1616 S. 8th St. Basket band solvent extractors, expellers, redier conveyors, flakers and spare rolls for all types of flakers. Representative: O. J. Hein, 3054 Indianola Ave., Columbus, Ohio.

Belleville 9, N. J.—WALLACE & TIERNAN INC., 25 Main St. "Merchen" belt-type gravi-metric scale feeders and meters for blending, inventory records, process yield records, quality control, bulk loading or unloading. Feeders adaptable for either continuous or batch operations.

Hoboken, N. J.—CONSOLIDATED PRODUCTS TO., INC., 52-54 Bloomfield St. Used Anderson and French screw presses, extractors, stills, columns and kettles.

West Orange, N. J.—OTTO H. YORK CO., INC., 6 Central Ave. "Yorkmesh Demisters," entrainment separator and mist eliminator wire mesh pads for installation in distillation equipment; evaporators, scrubbers, knockout drums and steam drums.

West Orange, N. J. — YORK PROCESS EQUIP-MENT CORP., 6 Central Ave. Liquid-liquid extraction equipment for refining processes. Entrainment separator vessels,

New York 17, N. Y. — HEYDEN NEWPORT CHEMICAL CORP., 342 Madison Ave. Manufactures chemicals including "Propyl Gallate," an antioxidant for the inhibition of rancidity in soybean oil and related products.

Poughkeepsie, N. Y. — DE LAVAL SEPARATOR CO. Offices also at 427 Randolph St., Chicago 6, Ill., and 201 E. Milbrae, Milbrae, Calif. Winterizing; also miscella clarifiers and protein concentrators; centrifugal separators.

Cleveland 2, Ohio — V. D. ANDERSON CO., 1990 W. 96th St. Coolers, screening tanks, flakers, steam traps, atmospheric and pressure meal toasters, distillation systems, filters, steam, gas, air and vapor purifiers, special fabricated equipment.

Erie, Pa. — ERIEZ MFG. CO. Permanent non-electric magnets, magnetic non-electric separators.

Glen Riddle, Pa. — PITTOCK & ASSOCIATES. Miscellaneous used and rebuilt oil mill equipment, including meal toasters, coolers, filter presses, oil screening tanks, grinders, scales, elevators and screw conveyors.

Homer City, Pa.—SYNTRON CO., 466 Lexington. Also plant at Blairsville, Pa. Electric vibrators for bins, hoppers, and chutes; vibratory feeders for controlling the flow of materials.

Mertztown, Pa.—ATLAS MINERAL PRODUCTS
CO. Corrosion-proof coatings, linings, cements
and jointing materials resistant to soybean oil,
solvents, alkalies and acids employed in the soybean industry.

Oreland, Pa.—ACME COPPERSMITHING & MA-CHINE CO. Distillation equipment. Drying ovens (with solvent recovery apparatus).

Philadelphia, Pa.—MINNEAPOLIS HONEYWELL REGULATOR CO., Industrial Div., Wayne and Windrim Ave. Design and fabrication of automatic control instruments and complete process control systems.

Brookings, S. Dak.—E, L. ERICKSON PRODUCTS. Designs and manufactures special equipment for research or other purposes.

Memphis, Tenn. — WILCO MACHINE WORKS, P. O. Box 3722, Municipal Airport. Manufactures Wilco-Stansbury Steam Saver—a closed condensate return system.

Fort Worth, Tex.—V. A. LESSOR & CO., P. O. Box 108. Used oil mill equipment.

Milwaukee, Wis.—ALLIS CHALMERS MFG. CO., gen. machinery div. Motors, pumps, controls.

NEUTRALIZATION

Chicago 15, III.—WURSTER & SANGER, INC., 1337 E. 52nd St. Kettle and continuous refining plants.

Poughkeepsie, N. Y. — DE LAVAL SEPARATOR CO. Offices also at 427 Randolph St., Chicago 6, III., and 201 E. Millbrae, Milbrae, Calif. tinuous refining.

Philadelphia 40, Pa.—SHARPLES CORP., 2300

Westermoreland St. Continuous refining.

Pittsburgh, Pa. — BLAW-KNOX CO., chemical plants div. Also Chicago 1, III.

SHORTENING

Chicago 15, III.—WURSTER & SANGER, INC., 1337 E. 52nd St. Complete blending, chilling and plasticizing plants.

Louisville 1, Ky.—GIRDLER PROCESS EQUIP-MENT DIV. Chilling and plasticizing apparatus. Pittsburgh, Pa. — BLAW-KNOX CO., chemical plants div. Also Chicago 1, III.

SOLVENT RECOVERY

New York 38, N. Y .- L. A. SALOMON & BRO., 216 Pearl St. Activated carbon for recovery in solvent extraction plants.

Columbus 19, Ohio—BARNEBEY-CHENEY CO., Cassady at 8th. Packaged solvent recovery equipment for recovering solvents from vent gases of solvent extraction plants.

Warren, Pa.-STRUTHERS WELLS CORP. Solvent recovery.

Milwaukee, Wis.—ALLIS-CHALMERS MFG. CO., gen. machinery div. Solvent removal driers. Contact columns.

SOLVENTS

Chicago 1, III.—AMERICAN MINERAL SPIRITS
CO., 230 N. Michigan Ave. "Amsco" hexane, heptane and a complete line of extraction sol-

- DRAKE PETROLEUM CO., Chicago 30, III. 6231 N. Pulaski Rd. Division offices, Cedar Rapids, Iowa; Houston, Tex.; Doraville (Atlanta), Ga.; Cleveland, Ohio. Supplier of "Drake" hexane, heptane and other extraction solvents; also chlorinated solvents.

Louisville, Ky.—BAUER-BROWN SOLVENT CO., div. of R. J. Brown Co., 1316 W. Kentucky St.

Detroit 26, Mich.—PENOLA OIL CO., 14300 McNichols Rd. W. "Penola" hexane, "Penola" "Penola" octane and various extraction heptone. solvents

Kansas City, Mo.-SKELLY OIL CO., industrial div., Skelly Bldg. "Skellysolve" for the extraction industry.

St. Louis 10, Mc.—R. J. BROWN CO., 1418 Wittenberg Ave. "Bronoco" extraction solvents, hexane and heptane.

New York, N. Y .- ESSO STANDARD OIL CO., 15 W. 51st St. Div. offices, Union Ave. at Bellevue, Memphis, Tenn.; 1410 Canal St., P. O. Box 1250, New Orleans 16, La. "Esso" hexane. "Esso" heptane, "Esso" octane and various wide cut extraction solvents.

Bartlesville, Okla.—PHILLIPS PETROLEUM CO., Special Products Div. "Phillips 66" extraction solvents, including high purity normal hexane (85% min.).

FOR HIGHER OIL RECOVERY AND PURITY IISF DRAKE HEXANE

Also Heptane and Other Extraction Solvents Immediate Tank Car Shipments — Deliveries via Transport Truck in Most Areas

DRAKE PETROLEUM COMPANY

6231 North Pulaski Road Chicago 30, Illinois **Juniper 8-2060**

P. O. Box No. 45 Cedar Rapids, Iowa **EMpire 5-5815**

Many companies in your industry depend on Skellysolve for exacting quality, prompt shipment, and expert technical service. Get more complete facts by writing or calling us today at LOgan 1-3575, Kansas City, Missouri.

Skellysolve for Animal and Vegetable Oil Extraction

APPLICATIONS

SKELLYSOLVE-B. Making edible oils and meals from soybeans, corn germs, flaxseed, peanuts, cottonseed and the like. Closed cup flash point about -25°F.

SKELLYSOLVE-C. Making both edible and inedible oils and meals, particularly where lower volatility than that of Skellysolve-B is desired because of warm condenser water. Closed cup flash point about 13°F.

SKELLYSOLVE-F. Extracting cottonseed, soybean meals and other products in laboratory analytical work. Originally made to conform to A.O.C.S. specifications for petroleum ether, and pharmaceutical extractions, where finest quality solvent is desired. Closed cup flash point about -50°F.

SKELLYSOLVE-H. Making edible and inedible oils and meals where greater volatility is desired than that of Skellysolve C or L. Closed cup flash point about -16°F.

SKELLYSOLVE-L. For degreasing meat scraps, extracting oil-saturated fuller's earth or other general extraction. Closed cup flash point about 12°F.

Names of Blue Book advertisers are carried in boldface in most listings.

The publishers have made every effort to make listings complete and accurate, but they cannot be held responsible for errors or omissions.

Most statistical tables appearing in the 1958 Soybean Blue Book were compiled by George W. Kromer, agricultural economic statistician of the statistical and historical research branch, Agricultural Marketing Service, U. S. Department of Agriculture.

Calumet River view of the new Chicago terminal elevator

GLIDDEN means quality in product, service and experience

44% PROTEIN EXTRACTED SOYBEAN OIL MEAL—a toasted meal for use in formula feed manufacture.

HI PROSOY—a toasted 50% protein soybean oil meal for specialized feed uses.

CRUDE DEGUMMED SOYBEAN OIL an extracted oil for edible and industrial uses.

LECITHIN — GLIDDOL, GLIDDENE, GLIDDOPHIL, GLIDDOMIX: Crude and special-purpose soy lecithins for edible and industrial use. RG* Lecithin for pharmaceutical and dietary use.

EDIBLE SOYA PRODUCTS for baked goods, meat products, prepared mixes, candy, restaurant menus, institutional food formulas and canned or dry-type pet foods: SOYARICH FLOUR—full-fat

soya flour; SOYAFLUFF FLOUR—practically fat-free soya flour; SOYALOSE FLOURS no. 103 and no. 105—low-fat types of soya flour containing fat in form of lecithin, a pure vegetable product; SOYABITS—practically fat-free soya grits sized for specific food uses.

INDUSTRIAL SOYA PROTEINS: ALPHA* PROTEIN—Pure, isolated soya protein used in making paper, paint, rubber, floor coverings, leather, fire-fighting foam and other products. SPRAYSOY—a special soybean product for use as a sticker and spreader in agricultural spray materials.

GRAIN MERCHANDISING — through modern terminal elevators at Chicago and Indianapolis—storage capacity 12 million bushels.
